Audit Log Preservation & Immutability Policy

Version: 1.0
Effective Date: 10th December 2024
Applies to: All modules and operations of the Loan Management System (LMS)

---

1. Purpose

This policy defines the principles and controls implemented to ensure that all critical system and user activity within the Loan Management System (LMS) is logged, preserved, and protected against tampering or deletion, in compliance with regulatory and operational requirements.

---

2. Scope

The policy applies to all audit logs generated within the LMS, including but not limited to:

- Loan origination and disbursement actions
- Repayment, prepayment, and reversal transactions
- User activity (logins, updates, approvals)
- Configuration changes
- API and system integration events

---

3. Policy Statements

- **Audit Logging:**
  All significant events and data changes are automatically recorded as audit logs with details such as user ID, timestamp, action type, affected records, and originating IP.
- **Immutability:**
  Audit logs are **immutable** and **cannot be edited or deleted** by any user, including system administrators. Once written, logs are preserved in a tamper-evident storage system.
- **Retention:**
  Audit logs are retained for a minimum period of **8 years**, in accordance with applicable regulatory and business requirements.
- **Access Control:**
  Access to audit logs is strictly restricted to authorized personnel with read-only privileges. Access is monitored and recorded.

- **Storage & Backup:**
  Audit logs are stored on secure, encrypted infrastructure with redundant backups and integrity checks.
- **Monitoring:**
  The LMS performs periodic checks to verify the completeness and integrity of audit logs. Any anomalies are escalated for immediate review.

---

4. Compliance & Review

This policy is reviewed annually or in response to regulatory changes.
